

SUMP İzmir Presented at TRA Dublin

08/05/2024

SUMP İzmir was showcased at the Transport Research Arena (TRA) held in Dublin. During a presentation by Urban Mobility Advisor Geert Koops, the project was briefly introduced, with a particular focus on citizen engagement within its scope.

The concept of bringing SUMP initiatives to the streets was highlighted as an example for international participants. This innovative approach to reaching citizens beyond the usual engaged audiences captured the attention of many policymakers, who expressed interest in potentially implementing similar methods in their own cities.
