

SUMP Türkiye Webinar 16

30 May 2024

The 16th SUMP Türkiye Webinar took place on Thursday, 30th May 2024, focusing on Intelligent Transport Systems (ITS) and Data. The first in a series of three webinars on the same topic, it was conducted with the participation of municipalities and aimed to inform those with limited experience in using technology to enhance road-based transport, as well as those seeking to implement effective policy goals.

The topics covered included:

- 🎯 Understanding the concept of Intelligent Transport Systems (ITS)
- 🎯 How technology supports the goals of Sustainable Urban Mobility Plans (SUMP)
- 🎯 Examples of different infrastructure types that can be applied in streets
- 🎯 Key traffic management techniques to enhance road efficiency

Participants gained insights into managing and developing sustainable mobility in their cities using ITS technologies.
