

Electric-Assisted Smart Bicycle Sharing System Launched

24/01/2024

Longer distances with less effort!

Izmir's electric bike sharing system, *Tripy*, was introduced to the public on January 22, 2024, at a launch event attended by Izmir Metropolitan Mayor Tunç Soyer and Head of Transportation Department Kadir Efe Oruç.

Mayor Tunç Soyer stated, *“With this system, which marks a revolution in daily urban transportation, we are leaving a mark on both the present and future of Izmir.”*

Offered as a new alternative solution for urban mobility, the system is designed with a sustainable and environmentally friendly approach to help combat the climate crisis and drought. It aims to transform transportation in Izmir by enabling residents to meet their longer daily commuting needs more comfortably and with less effort—by bicycle.
