

## SUMP Türkiye Webinar 17

13 June 2024

The 17th SUMP Türkiye Webinar, the second in a three-part series on Intelligent Transport Systems (ITS) and Big Data in Sustainable Urban Mobility Planning, focused on advanced techniques and strategies for using technology to enhance road-based transport.

Topics covered:

- The use of advanced Intelligent Transport Systems (ITS) techniques to achieve the goals of sustainable urban mobility planning.
- How these technologies can be utilised to create more advanced and integrated traffic management strategies.

Participants gained in-depth knowledge on managing and enhancing sustainable mobility in their cities using ITS technology and Big Data.
